READERS REVIEWS

An Amazing Journey of Inner-Space, – June 20, 2007
Roger Dovre

"This book isn't for average minds, this book isn't for above average minds; however, this book is for extraordinary minds; the peaceful and spiritual warriors of planet Earth and humanity's sake! It is for the ones whom are beginning to awaken to the fact(s) that we've been lied to by multiple and various PTB's in order to control and manipulate everyone for their own service-to-self agendas.

Over the past several years, I've read and studied everything I could in regards to: The coming Earth changes, spirituality, metaphysics, religion, philosophy, psychology, conspiracy theories, extraterrestrials and suppressed technologies. In "Zen of Stars," St.Clair puts it together with amazing beauty, clarity and honesty.

St.Clair not only demonstrates, exposes, explains and shows how occult spiritual warfare is being waged against humans, which has been ongoing for thousands of years; he also provides the reader with a system and solution to protecting oneself against these occult, psychic and spiritual attacks.

I truly believe and feel life and reality is about to dramatically unravel before our very own eyes: The earthquakes, volcanoes, tsunamis, tornadoes, rising water levels, economic collapse, more and expanded wars and etc. are just around the corner. Are you prepared or preparing for these events? "Zen of Stars" is not only about physical preparedness; but also, and more so, about emotional and spiritual preparedness as planet Earth begins to shift into the 4th dimension reality: *"Quintessentially, this book is a road map and compass to help humanity navigate through the rough storms and times which are shortly ahead for all of us."*

David Byrne wrote:

“Michael St.Clair has done something very special with this publication. For he has gone places that few if any could go. As Cosmologist, Astrophysicist, Historian of the ancient world, Shaman, Researcher, Political Observer, and all of the other qualities and Learnedness that becomes him, has been brought to bear in this work.

St.Clair deals with topics that go beyond the drama projection of that which is portrayed as life. He does this in a fearless way, while dealing with difficult subjects.

He writes on the history of a time before, what we have been given as history, and speaks to the spirituality of our beingness, our origins, aliens, religionists, the luminous ones beyond the creation, and the creation itself.

The cosmologist in him looks to the stars, here he finds links to the present and future. As mundane Astrologer he sights and links the past.

It is a filament substanceless, yet more real than physical matter.

It is a connection of oneness that permeates the energy field, and brings order, harmony and balance from out of the disturbed energy of chaos. Only the few who be in such place can project this.

St.Clair has linked so much in the life that is and that which is beyond. That so, so much that is fragmented in human awareness can be brought together. Can be seen and understood on the one page, the page of ones life. He does this with no projection of fear, the reader does not have to go into fear as NONE is projected.

A Pure Intelligence is at work in this writing.

So for those who want to taste, learn, and understand why this world is the way it is, where it is going, of the dramatic changes to come. What choices there are for the enormous potential that is you, then this is a must read. As St.Clair states, “If we can predict the future, we can change it.”

– Highly Recommended.”

FORESEEN

Beyond Time

Readers of the book *Zen of Stars* know that to overcome doubt and fear is the basis to exist in a state of being set free, and yet it is also the hardest thing for a human being to do.

This is also the prerequisite to understand the book – to apply the freedom navigations, for yourself, inside your own mind.

To activate the teachings of *The Master of The Light* who guides you through *FORESEEN* means to implement the guidance of your own higher self, from the future into this moment of your life in the now.

FORESEEN, hyper-dimensional reality set in 2025, reveals how mankind becomes aware of the major extraterrestrial forces in conflict over planet earth, leading to the discovery of a *NewMind Technology*.

“The Future belongs to him who knows how to wait.”
